ARUNACHAL PRADESH
791110

DATE: 26ᵗʰ August 2024
VENUE: Arunodaya University

Theme: Role of digitalization in contemporary era
(Blended Mode)

Concept Note:

The digitalization phenomenon spans various fields, including natural sciences, social sciences, and humanities, encompassing philosophical, legal, political, and economic aspects. Researchers are becoming increasingly acquainted with concepts such as digital human rights, digital inequality, digital economy, digital space, electronic voting, and distance education. Many events are gradually adopting the "online" format. In terms of civilisation development, digitalization enables the construction of a unique form of man-made civilization. A defining characteristic of this civilization is the rapid evolution of equipment and technologies, driven by the systematic application of scientific knowledge in production. This interdisciplinary approach highlights the interconnectedness of various domains and underscores the profound impact of digitalization on contemporary and future societies. With the development of man-made civilization over several centuries, society, values, and traditional social roles have undergone significant changes. Rapid global transformations are occurring, and humanity is likely to experience more changes in the next two to three decades than in the past thousand years.

Hence, the economic, social and cultural domains are only a few of the areas of society where digitalization has had a major impact. It has had both beneficial and detrimental impacts, and in the years to come, its influence is predicted to grow even more.

Objectives:

This National Seminar will provide a comprehensive overview of digitalization, including its historical context, current trends, and future projections to enhance the skill of participants. It will also explore and analyze how digitalization affects different sectors such as politics, economy, education, healthcare, and social services. The key of digitalization is to emphasize the importance of digital literacy and the role of education in preparing individuals for a digital future.

The Seminar aims to address the following:
- ✓ To address digitalization's challenges and opportunities.
- ✓ To highlight the issue of digital inequality and explore strategies to bridge the digital divide.
- ✓ To address importance of digital literacy.
- ✓ To understand digital human rights and the ethical challenges posed by digital transformation.

Expected Outcome of the Programme:

The Seminar is expected to enhance and gain clear understanding of digitalization's scope and its multifaceted impact on society.

1. To develop an awareness of the ethical issues and human rights considerations in the digital age.
2. To emphasize the importance of digital literacy.
3. To demonstrate digital inequality and potential solutions to promote inclusivity.
4. To address digitalisation issues in society.
5. To understand various interdisciplinary dialogues, leading to innovative solutions and collaborative research initiatives.
6. To gain insights into policy-making processes and contribute to the development of effective digital policies.
7. To develop an awareness of the ethical issues and human rights considerations in the digital age.

The Sub-theme of the Seminar is as follows:

1. Teaching modification, learning and education equality.
2. Influence of digital media.
3. Documentation of culture.
4. Identity formation in digital age.
5. E-governance.
6. Artificial intelligence in politics.
7. Digital commerce.
8. Digital Marketing.
9. Digital economy.
10. Digital activism and social change.
11. Digital banking.
12. Digital democracy and participation.
13. Digitalisation of services.
14. Global culture interaction.

15. Security and transparency in transition.
16. Digitalisation and dependence.
17. Algorithms and political decision making.
18. Digital politics and environment.
19. Digitalisation on privacy.
20. Digital geopolitics.
21. Fintech.
22. E-commerce.
23. Digitalization and gender gap.
24. Cyber law and data protection.
25. IPR in digital era.
26. MOOCs: Impact on Education.
27. Social and Cultural shifts.
28. Digital pedagogy in language/literature.
29. Digitalization in environment.
30. Indian Knowledge system.
31. Urban growth pattern and trend.

(N.B.   Any other topic relevant to the theme of Seminar)
